

Exterior Door Guide

Drexel
MILLWORK & DOORS

About Drexel Millwork & Doors

People don't buy WHAT you do. They buy WHY you do it.

HISTORY | Different from our competition, Drexel Millwork & Doors (DMD) launched vertical integration within Drexel Building Supply in 2022. From one location in 1985 to nine locations in 2023, our mission has stayed consistent: supply happiness.

WHY | Our "why" is aligned around two important things:

- 1. Our mission to supply happiness.**
- 2. All eleven of our core values:**

ETHICS | WINNING ATTITUDE | RESPECT | DEVELOPMENT | ACCOUNTABILITY | BALANCE | TEAMWORK | COMMUNICATION | CHANGE | HAVE FUN | CONNECTION

WHAT | From wood species, profiles, prefinishing options, and much, MUCH more, we'll help you find exactly what you're looking for.

supply. happiness.

Bronze	Weatherwood	Terratone	Grapevine	Rich Clay	Blue Lava

Paint colors are approximate and may vary in appearance to printed materials.

Door Specifications

Entry Systems Include:

Your selected door design, 4¹/₁₆" primed exterior door frame, high-dam sill, compression weatherstrip and (3) 4 x 4 zinc dichromate hinges.

Door will be bored for a lockset with a 2¹/₈" face bore and a 2³/₄" backset. All doors will have a door sweep attached. Mortise edge prep on steel doors will be square edge. All wood edge doors will have a radius mortise edge prep.

Continuous Head, Sill and Mull System

Utilizing a continuous head, sill and one piece ("Fatboy") mull assembly maximizes the stability and rigidity of any sidelite unit. This continuous system also simplifies assembly and virtually eliminates racking and bending of the unit.

Note: Mill (aluminum) finish is standard on all sills. Brass or Bronze finishes are available for an additional up charge.

High-Dam Adjustable Sill

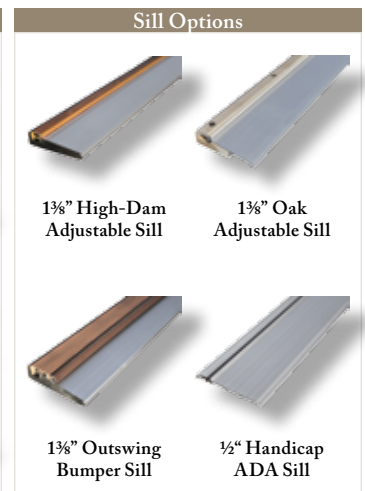

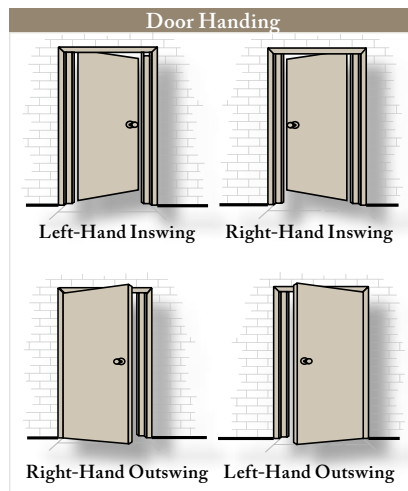

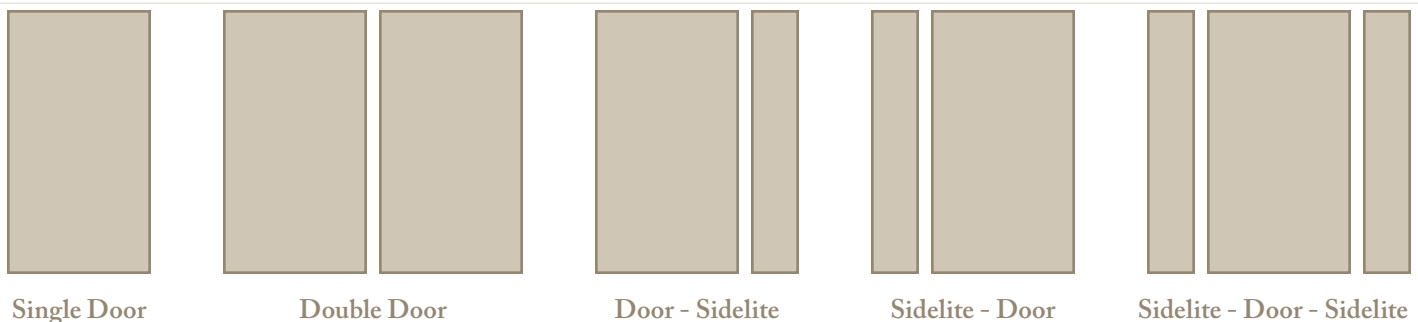

High-dam sill creates a positive barrier to water infiltration. The high-dam design feature holds back the inevitable rise in the water level against the threshold as wind speed increases. Combining high-dam technology with a high quality bottom seal, securely protects the bottom of the door unit from air and water infiltration.

The adjustable cap feature allows for easy field adjustments. High quality metallic and composite materials are featured for rot-resistance and protection against harsh weather conditions. Fixed bumper and low-profile designs are also available to meet outswing or handicap accessible applications

High-Performance Weatherstrip

Vinyl-wrapped, foam filled, compression weatherstripping and corner seals are added to the door frame providing protection against air and water infiltration.

Door Configurations

Door & Frame Options

Trilennium® 3000 Multi-Point Lock Styles

3000 Edge Mechanism

Total Frame Defense™

Treated Paint Grade Products

There's More Than One Way to Save a Frame

Total Frame Defense™ is achieved by treating the entire door frame - *Top to Bottom.*

Our product protects against:

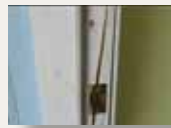

- *Mold & Fungi*
- *Splitting & Checking*
- *Warping & Twisting*
- *Water Damage Rot & Decay*

Features

- Our products are fully treated so the entire frame is protected, not just the last few inches.
- Total Frame Defense™ Finger-joint products are primed with a high quality acrylic primer.
- Total Frame Defense™ products may be finished with latex, acrylic or oil-based paints.
- Products available with our Total Frame Defense™ Warranty include door frames, brick mould, and mull posts.

Mold Damage

Splitting Checking

Warping Twisting

Water Damage Rotting
