A NOVO Building Products Company

**MIDWEST DISTRIBUTION CENTER
STOCKED STAIR PARTS**

People don't buy WHAT you do. They buy WHY you do it.

HISTORY | Different from our competition, Drexel launched vertical integration within Drexel Building Supply in 2022. From one location in 1985 to nine locations in 2023, our mission has stayed consistent: supply happiness.

WHY | Our "why" is aligned around two important things:

- 1. Our mission to supply. happiness.**
- 2. All eleven of our core values:**

**ETHICS | WINNING ATTITUDE | RESPECT | DEVELOPMENT |
ACCOUNTABILITY | BALANCE | TEAMWORK | COMMUNICATION |
CHANGE | HAVE FUN | CONNECTION**

WHAT | From wood species, profiles, prefinishing options, and much, MUCH more, we'll help you find exactly what you're looking for.

supply. happiness.

Design Your Staircase

Staircase Type

Your floor plan will dictate your style. Make sure the options you are selecting are compatible.

Straight

U-Shaped

L-Shaped

Flared

Winder

Curved

Post-to-Post System

Over-the-Post System

Style

Before you begin, there are a two key decisions you must make:

1. Do you want your railing post-to-post or over-the-post?
2. Do you want your stairs to have an open tread or closed tread?

Design

Now it's time to complete your look!

1. Choose your balusters
2. Choose your newel posts
3. Choose your handrail
4. Select your finish
5. Select accessories: Handrail brackets, rosettes and more

Species Expectations

POPLAR

Poplar is characterized as a smooth, tight grain with a relatively soft texture. Because it is a fast-growing, columnar tree, it absorbs minerals from the soil differently than slower-growing hardwoods. It can range from creamy white to "mineral streaks" of olive green, purple, or dark brown/black. This is often called "Rainbow Poplar" and highlights the deep connection between the tree and its environment.

MAPLE

Maple is a dense, heavy hardwood with a very subtle, typically uniform grain. The tree's wide-spreading branches and high density create a naturally tight grain and unique mineral streaks, which occur as the wood captures nutrients. While the appearance is usually consistent, you'll often find small dark spots or rare, decorative patterns like "birdseye" or "curly" figures.

RED OAK

Red Oak is known for its prominent, "open" grain pattern, extreme durability, wide, and high contrast. Expect significant tonal shifts and deep ridges that catch stain to highlight the wood's powerful, symmetrical growth and give Oak its "classic" furniture-grade reputation.

KNOTTY ALDER

Alder is a smaller, more irregular tree compared to the others. It often grows in smaller clusters with a more slender, less formal trunk. Celebrated for its informal charm, Alder features frequent sound knots and pith marks. These are the natural signatures of a smaller, more irregular tree that brings warmth and texture to a space.

Finish Options

Classic Collection

Our goal is to help you achieve a seamless and harmonious interior. By aligning our millwork factory finish options with a trusted cabinetry manufacturer's palette, we enable you to create a cohesive collection that blends your cabinetry, flooring, and millwork flawlessly. Our partnership ensures that we are always up to date with the latest trends. This allows us to provide you with on trend options that will keep your home looking stylish for years to come.

STAIN

AVAILABLE IN POPLAR, MAPLE, OAK, KNOTTY ALDER

PAINT

While this digital/printed guide serves as a beautiful starting point for your design journey, please note that screens and ink cannot perfectly replicate the depth, sheen, and organic texture of our factory-finished millwork. Light interacts differently with wood than it does with pixels. To ensure your vision matches your reality, we strongly recommend making your final color and species selections from the physical samples in one of our showrooms.

Custom Creation

This service allows for a high degree of personalization, whether it's drawing inspiration from the extensive Sherwin-Williams color palette, or seeking to replicate an existing hue. The process is designed to ensure accuracy and satisfaction. Customers can provide a physical sample, such as a piece of trim or a color swatch, and skilled technicians will meticulously work to blend it, with up to two attempts if necessary. Physical samples are created to show how the living material of wood varies in grain and color under home lighting. We value precision. If the color is not achieved within two attempts, we will mutually agree to move in a different direction to protect project timelines.

For details and pricing, lean on your Drexel Quarterback for more information.

RTS - DMD Stock Ready to Ship

Get the look featured on the front cover using either of these fasteners:

Our concealed iron baluster fasteners are designed to give you a clean, finished look without the need for adhesives or shoes. Simply slide the plastic insert into the bottom of the trimmed baluster, install the dowel screw into the tread, and screw the plastic insert and baluster tight against the tread surface. Made for all our 1/2" hollow square iron balusters installed on open tread or level runs. Each kit includes tapered plastic insert, dowel screw, and instructions.

For 1/2" Balusters Only
(Level Applications)

LJ SMITH SKU #
LIH-HOLINSERTW/SCREW

Our newest concealed iron baluster fastener can be used for open tread stairs, kneewall stairs and level runs. Simply install the lag of the assembled fastener into the wood tread, kneewall plate or landing tread and slide the bottom of the trimmed baluster over the fastener until the baluster is tight against the wood mounting surface. Made for all our 1/2" hollow square iron balusters and comes with instructions. Patent Pending.

For 1/2" Balusters Only
(Level and Kneewall Applications)
